CelleClé Skincare's DetoxyBright

Posted: June 15, 2016

DetoxyBright helps infuse brightness into tired, depleted skin. It releases energizing niacinamide and detoxifying cotton stem cells to enhance the radiance of the skin.

The cream-to-foam mask cools the skin's surface temperature to calm redness and prevent reoccurrence. The product also increases the skin's oxygen supply for a healthier and more even toned look.

The key ingredients to help brighten the skin include:

- Niacinamide
- Perfluorocarbons
- Cotton stem cells
- DexPanthenol
