# WORTH A LOOK

Take a closer look at products that are shaping our industry.

Alera Skin's **Zensa Topical Anaesthetic** is an FDA- and Health Canada-approved product with 5% lidocaine that desensitizes the skin for painful procedures, including tattooing, laser hair removal, waxing, and injections. This product contains health-conscious ingredients, like purified water and vitamin E, which provide anti-inflammatory properties. Zensa Topical Anaesthetic is the most natural numbing cream on the market. 844-441-7546 or [aleraskin.com](http://aleraskin.com)

**Vita C Serum** by ATZEN Superior to Organic™ Skin Care is made with sodium ascorbyl phosphate and glycoaminoglycans. Sodium ascorbyl phosphate is 50 times more bioavailable and 250 percent more effective than other forms of vitamin C. Unlike water-soluble vitamin C, which cannot get through the lipid membrane of cells, sodium ascorbyl phosphate is lipid-soluble and absorbs into the skin cells. This serum limits oxidative stress in the body, reducing contributors to aging, controlling breakouts, and brightening the skin. 800-500-1886 or [atzen.com](http://atzen.com)

BeeAlive's **Kaolin Clay Cleanser** is a gentle, deep cleanser for all skin types that helps remove impurities and makeup without stripping the skin. It contains propolis, which helps to exfoliate and cleanse the skin, and a fruit enzyme blend that removes dull skin, provides visibly improved skin tone, and reveals a glowing complexion. This cleanser can also be used as a mask for a deeper clean and the removal of excess oils. 800-543-2337 or [beealive.com](http://beealive.com)

Biopelle's **Tensage® Stem Cell Eye Cream**, which features CellPro™ technology, is the first topical skin care product to assist the natural activity of stem cells in creating new, healthy skin cells. CellPro is an extract that contains signaling proteins from the eggs of the *Cryptomphalus aspersa* snail. This ingredient is clinically proven to help replenish skin cells, reinforce the skin's integrity, and restore healthy, youthful-looking skin. Additional ingredients help to reduce under-eye puffiness and diminish dark circles. 866-424-6735 or [biopelle.com](http://biopelle.com)

**Eyebright Anti-Puffiness Gelée** by CBI Laboratories dramatically reduces under-eye bags and puffiness with the revitalizing effects of Eyeliss™, a powerful blend of peptides that is formulated to improve circulation and decrease capillary permeability, improving elasticity and firmness. Green tea and evening primrose provide the delicate eye area with unparalleled phyto-extracts and antioxidants to deeply nourish and soothe the skin, while sodium hyaluronate regulates hydration by replenishing lost moisture and forming a non-occlusive, protective layer on the skin. 972 241-7546 or [cbiskincare.com](http://cbiskincare.com)

**Daily Hydration Broad Spectrum SPF 43 Oil-Free Moisturizer** by Circ-Cell Skincare protects the skin from sun damage while hydrating and refueling the skin. This product is a non-comedogenic moisturizer that contains zinc

to effectively protect the skin and antioxidants to neutralize free radicals. Furthermore, its vitamins B12 and C condition the complexion for a healthy and smooth finish. It also provides a beautiful glow to the skin post-application and goes on silky smooth. 307-733-4313 or [circell.com](http://circell.com)

CelleClé's **MultiRestore Corrective Eye Contour Treatment** radically addresses multiple changes experienced by the aging eye. Its state-of-the-art biomimetic technologies lift and smooth eyelid folds and counteract sagging by protecting the extracellular matrix from damage generated by pollution. It also reduces surface puffiness and visibly firms, lifts, and sculpts eyelid contours while promoting indescribable skin smoothness. 888-731-2525 or [cellecleskincare.com](http://cellecleskincare.com)
